Description of Change

The bottom substrate material is changing from G200 to N4000.6

Reason for Change

The G200 is an obsolete material, some of our suppliers made 2 years stock and this stock is now arriving to the end. The N4000.6 is already qualified with the current 3D PLUS PID 3300-04546-12 and used. It is therefore applicable for manufacturing to all of our suppliers.

The material change induces a color change for the bottom of the 3D PLUS modules.

Affected Products

All 3D PLUS products.
